Streamline your entire chart management process.

Our complete chart management software integrates nimble's transcription, coding, and billing workflows and interfaces directly with your practice management software so you can put your expertise to better work.

Investing in an EHR system is not always practical, so we built EZChart:

Cost effective

Go digital without breaking the bank.

Time saver

Automate chart pack preparation and expedite scanning and printing.

RCM integrated

Gain efficiencies by connecting your transcription and billing solutions.

CBO friendly

Manage multiple locations within your centralized billing operation.

Other features & benefits:

Simplify scheduling

Pull case information in real-time, thanks to a direct connection with your existing scheduling system.

One-click printing

Print all your daily charts with a click of a button.

Track and audit

Know the status of every case and every chart in real time from one convenient dashboard.

"nimble has taken stress off our team, both in terms of time and the anxiety that comes with making sure our charts are managed and secured properly."

Director, CBO of ASC Management Company

Put nimble solutions to the test.
